

I want Modification and customization features in my website.

My Website Url : <https://shizukanobita.tech/>

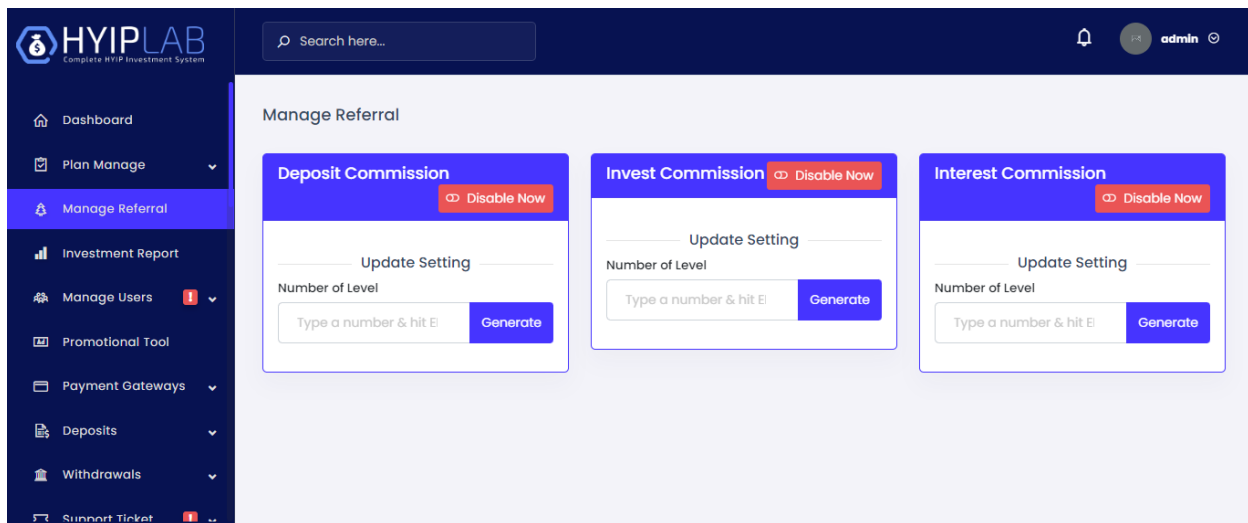

My Website admin url : <https://shizukanobita.tech/admin>

My Website Coding

- Software Framework : Laravel
- Software Version : PHP 7.x
- Files Included : JavaScript JS, HTML, CSS, PHP, SQL

1. My website has multi level referral system. You can see admin panel and screenshot

Here we are from 1 to 100+ . Can generate multiple referrals

this is your user dashboard panel. You can see their Total investment Tab. If a user invests her money in any of the plans, then it is called a total investment.

on this platform, all users referrals are with other users no one is here without a referral.

If a user pays deposit, interest, interest commission then his amount goes to all lower referral users.

This is our work process. Finally, I tell you what you change on this area

You Can Add Greater then(>) Less than(<) Features

The greater and less than comparison of interest commissions:

Suppose

A has invited B and

B has invited C

C has invited D

A has invested 5000

B has invested 3500

C has invested 4500

D has invested 5000

So A will get daily interest commissions of B , C and D respectively.

In the same way

B and C will not get no one's commissions as his Downline has invested greater than him

The screenshot displays the HYIPLAB dashboard interface. On the left, the 'ACCOUNT BALANCE' section shows a total of 1,005.00, with 1,000.00 in the Interest Wallet. Below this are 'Deposit' and 'Withdraw' buttons. A sidebar menu includes 'Dashboard', 'Investments', 'Deposit', 'Withdraw', and 'Transfer Balance'. The main content area features three summary cards: 'Successful Deposits', 'Successful Withdrawals', and 'Total Investments', all showing 0.00 INR. Each card includes a table with 'Submitted', 'Pending', and 'Rejected' columns, all with 0.00 values. The 'Total Investments' card's '0.00 INR' is highlighted with a red box. Below these cards is a 'Latest ROI Statistics' section. A small 'UU' profile icon is in the top right corner.

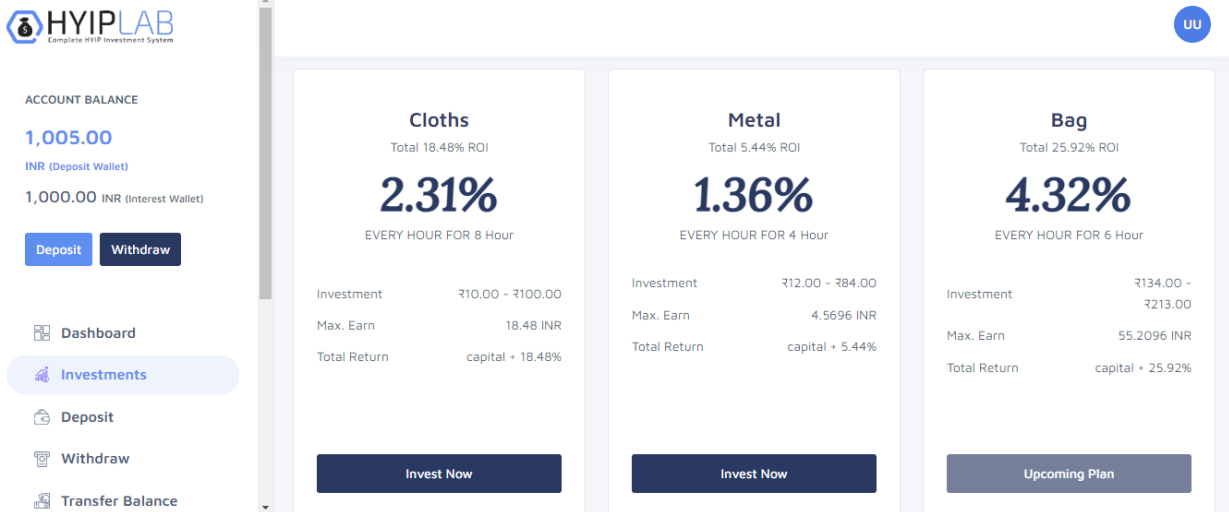

Successful Deposits		
Submitted	Pending	Rejected
₹0.00	₹0.00	₹0.00

Successful Withdrawals		
Submitted	Pending	Rejected
₹0.00	₹0.00	₹0.00

Total Investments		
Completed	Running	Interests
₹0.00	₹0.00	₹0.00

2. You Can show disabled Plan as a Upcoming Plan user don't buy only they can see. After the Activation any one can buy a plan.

You Can show a disabled Plan as an Upcoming Plan on Plan Page. users don't buy only they can see the Upcoming plans. After the Activation, anyone can buy a plan.

3. On the User Registration time get Generate random Reference id.

Here you can give me a reference box. If any user come here then its automatically get its reference id. And any one come direct then its generate automatic reference id.

Here you can give me a reference box. If any user comes here by reference link then it automatically gets its reference id. If anyone comes direct then it generates an automatic reference id.

Create an Account
You can create account using email or username and the registration is fully free

You're referred by **user01**

Username *

E-Mail Address *

Country Mobile *

Password *

Confirm Password *

4. user login by mobile number and password. Not login through username & Mobile Number.

Note: Don't forget to validate the reference ID. Register time reference id is right and wrong, must check from database and if it is wrong then user will not be able to register.

Login to your account
